ThutoNet Junior Developer Take-Home Project: Landing Page and Feature Dashboard

This project is designed to assess your front-end development skills and understanding of user experience (UX) principles. You are tasked with creating two web pages:

1. ThutoNet Landing Page:

- **Goal:** Design a visually appealing and informative landing page that introduces ThutoNet's value proposition to potential users (learners, educators, parents).
- **Requirements:**
    o Use HTML, CSS, and JavaScript (optional).
    o Include an engaging hero section with a captivating image or video showcasing ThutoNet in action.
    o Clearly communicate ThutoNet's mission and focus on STEM and Financial Literacy education.
    o Highlight key features and benefits for learners and educators.
    o Include a clear call to action (CTA) button, such as "Sign Up for Free" or "Learn More."

2. ThutoNet Feature Dashboard:

- **Goal:** Create a basic, functional dashboard layout that showcases the breadth of ThutoNet's features and functionalities.
- **Requirements:**
    o Use HTML, CSS, and JavaScript (optional for basic interactivity).
    o Design a user-friendly dashboard layout that is easy to navigate.
    o Include sections or tiles representing core features of ThutoNet, such as:
        ▪ Interactive Lessons
        ▪ Gamified Learning Elements
        ▪ Quizzes and Assessments
        ▪ Learning Progress Tracking
        ▪ Content Library (for learners)
        ▪ Resource Management Tools (for educators)
        ▪ Collaboration Tools (for learners and educators)
    o Each section/tile should have a clear title and brief description of its functionality.

- Maintain a consistent visual style that aligns with the landing page design
